EDUCATION

Biluru Gurubasava Mahaswamiji Institute of Technology, Mudhol *Aug. 2023 – Aug. 2027*
Bachelor of Engineering (B.E.) in Computer Science Engineering CGPA: 7.50

PROJECTS

DishLyst | *React, TypeScript, Tailwind CSS, Supabase, PostgreSQL*

- Designed and developed a **responsive web app** that lets users compare the same dish across multiple restaurants by price, rating, and availability, with **advanced search and filtering** to speed up discovery.
- Built the **full stack** with **React, TypeScript, and Tailwind CSS** on the frontend plus **Supabase** and **PostgreSQL** on the backend, including **authentication**, a **normalized database schema**, **cart and checkout**, a **restaurant admin dashboard**, and **role-based access control**.

Education Admin System | *React, TypeScript, Tailwind CSS, MongoDB, PostgreSQL* [Demo](#)

- Built a secure **React-based admin dashboard** for managing **200+ student records** with **authentication**, **fees tracking**, **attendance monitoring**, and homework management.
- Implemented **bcrypt password hashing**, **Supabase Row Level Security (RLS)**, and server-side verification, while integrating **Google Drive** and **WhatsApp APIs** to automate homework sharing and absent notifications, **reducing manual administrative work by approximately 70%**.

Techathon Certificate Generator | *React, TypeScript, Tailwind CSS, Firebase, PDF Generation* [Demo](#)

- Developed a web-based **certificate generation** platform capable of generating and exporting **500+ personalized certificates** in bulk using **CSV uploads** for participants, teams, and winners.
- Designed a **responsive admin dashboard** for managing event data, certificate templates, and **automated PDF generation**, **reducing certificate distribution time from hours to minutes** for technical events and hackathons.

TECHNICAL SKILLS

Concepts:	Data Structures and Algorithms, Operating Systems (Basics)
Languages:	Python, Java, SQL (PostgreSQL), JavaScript, TypeScript, HTML/CSS
Frameworks & Technologies:	React, Node.js, Flask, FastAPI, Tailwind CSS
Databases:	PostgreSQL, MongoDB, Supabase, Firebase
Developer Tools:	Git, GitHub Actions, Linux, Google Cloud Platform, VS Code

CERTIFICATIONS

- AWS APAC – Solutions Architecture Job Simulation
- Foundations of Cybersecurity
- Connect and Protect: Networks and Network Security
- Play It Safe: Manage Security Risks
- What is Data Science?
- Algorithmic Thinking (Part 1)

SUMMARY

B.Tech Computer Science student focused on cybersecurity, cloud technologies, and full-stack web development. Seeking internships to apply skills building secure, scalable applications and gaining industry experience.
